LIFESYSTEMS

Portable Mosquito Killer Unit Instructions for Use

Manufactured in EU for
Lifemarque Limited

CODE: 7070

PRECAUTIONS: Read all instructions and safety cautions before use and keep for future reference. Use only in accordance with the directions on the label

INSTRUCTIONS:

1. Remove the battery cover by depressing the two release buttons on either side of the unit and gently pulling the cover downwards. Insert the 2 AA batteries as indicated by the markings on the unit. Replace the cover.
2. Remove the refill cartridge from its packaging and insert it into the cartridge slot on the side of the unit.
3. Slide the power switch to the ON position (X).

4. The unit will start to knock mosquitoes down within minutes. However, to ensure best results, if you are using the unit in the room where you intend to sleep, it is recommend that you switch the Mosquito Killer on one hour before going to bed.

5. The unit works by vapourising the insecticide in the cartridge, killing any mosquitoes in the room. Each refill cartridge should last approximately 6 days.

6. To replace the cartridge, switch the unit OFF and remove the exhausted cartridge. Insert a fresh cartridge into the slot.
