LIFESYSTEMS

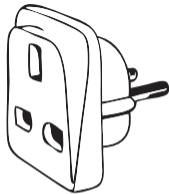

Worldwide Travel Adaptor Instructions for Use

Manufactured in China for
Lifemarque Limited

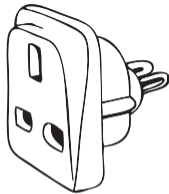

This travel adaptor fits the world's most widely used sockets. The main plug-socket systems are the UK, European, American and Australian. Most other countries have adopted one of these systems.

PREPARATIONS FOR USE: Many travel appliances are equipped to run on different voltages. Ensure that the appliance is suitable for use on the local electricity supply. Most European and Australasian countries use a 220-240 VAC supply. Most of the USA and American influenced countries use a 120 VAC supply. Check carefully before use.

WARNING: This adaptor does not change voltages.

EUROPEAN ROUND 2-PIN ADAPTOR: Converts UK 3-pin plugs for use in European round 2-pin sockets. Rated up to 7.5 amps, it is suitable for use with both earthed and unearthed appliances.

AMERICAN/AUSTRALIAN FLAT 2-PIN ADAPTOR: Converts UK 3-pin plugs for use in American flat 2-pin sockets. The adaptor pins can also be rotated to fit Australian 2-pin sockets. Rated up to 10 amps, it is suitable for use with unearthed appliances.

INSTRUCTIONS FOR USE:

Read all instructions carefully before use and keep them safe for future reference.

EUROPEAN ADAPTOR: Insert the adaptor into the wall socket and use the appliance as normal.

AMERICAN/AUSTRALIAN ADAPTOR: Check the orientation of the pins. For use in American sockets, ensure that the flat pins are turned to the parallel position. For use in Australian sockets, ensure the pins are in the angled position. When the pins are aligned with the socket, insert the adaptor into the wall socket and use the appliance as normal.
